

SUMIT VERMA

Bengaluru, Karnataka, India | +91 9771004303 | sumit.verma.aie@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

AI & ML undergraduate with experience in Full-Stack Development, Generative AI, Backend Engineering, and AI-powered software systems. Skilled in Python, JavaScript, React.js, Node.js, Django, REST APIs, LangGraph, and LLM-based applications. Passionate about building scalable products, multi-agent systems, and intelligent developer tools.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, C++, SQL

Generative AI & Machine Learning: LangGraph, LLM ,Prompt Engineering, RAG, Groq API, NLP, Machine Learning, OpenCV, Scikit-Learn, Pandas, NumPy

Frontend: React.js, HTML, CSS, Bootstrap, Material UI, Streamlit

Backend: Node.js, Express.js, Django, REST APIs, JWT Authentication

Databases: MySQL, MongoDB

Cloud & DevOps: Docker, Git, GitHub, Linux, Postman, Cloud Computing

Software Engineering: Data Structures & Algorithms, OOP, Software Engineering, Agile Methodologies, System Design, MVC Architecture

PROJECTS

Samyukt – Intelligent Collaborative Version Control Platform Ongoing

React.js, Node.js, MongoDB

- Developing a cloud-based platform for repository management, version control, and intelligent conflict resolution.
- Implementing real-time collaboration, commit tracking, branching, merge workflows, and role-based access control.

CodeGenie – Multi-Agent AI Coding Assistant 2026

Python, LangGraph, Groq, Streamlit

- Built a multi-agent AI system that converts natural language requirements into complete software projects.
- Designed Planner, Architect, Coder, and Reviewer agents for automated project planning, code generation, and validation.
- Generated multi-file web applications with automated file creation, project packaging, and downloadable source code delivery.

PresenceIQ – AI-Driven Web-Based Automated Attendance System 2025

Django, OpenCV, MySQL, REST APIs

- Developed an AI-powered attendance platform using facial recognition and computer vision technologies.
- Built backend services with Django, JWT Authentication, REST APIs, MySQL, and real-time face recognition using OpenCV.
- Presented research at Smartworld 2025 International Conference and received Best Presentation Award.

Hospital Management System 2025

React.js, Node.js, Express.js, MySQL

- Developed a full-stack healthcare platform with authentication, appointment scheduling, patient records, and role-based dashboards.
- Built scalable REST APIs following MVC architecture and software engineering best practices.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning 2023 – 2027

Visvesvaraya Technological University (VTU), Bengaluru

CERTIFICATIONS

- Generative AI for Everyone – DeepLearning.AI
- NPTEL Elite – Introduction to Industry 4.0 and Industrial Internet of Things
- Machine Learning Fundamentals – Coursera

ACHIEVEMENTS

- Second Place / Best Presentation Award – Smartworld 2025 International Conference for the paper ‘*PresenceIQ: AI-Driven Web-Based Automated Attendance System*’.
