PROJECT

Hospital Management System

Team Project | React, Node.js, MySQL | Feb 2025 – May 2025

- Built a full-stack web app for managing patients, doctors, appointments, and billing with role-based access.
- Developed RESTful APIs with Node.js and MySQL; frontend built using React.js and Bootstrap.
- Implemented JWT authentication and deployed on local server for testing and demo.

PresenceIQ: AI-Driven Web-Based Automated Attendance System

Team Project | Django, React.js, MongoDB, OpenCV | August 2025 – October 2025

- Developed a smart, proxy-proof attendance system using facial recognition (Haarcascade, LBPH, CNN, DeepFace).
- Created a Django backend and React.js frontend; integrated OpenCV/dlib for real-time face detection and recognition.
- Implemented multi-role dashboards, automated attendance reports, and notification features; deployed for demo on local server.

LEADERSHIP EXPERIENCE

Team Lead – Hospital Management System Project

Bangalore Technological Institute | Feb 2025 – May 2025

- Led a team of 4 in developing a full-stack hospital management web application using React, Node.js, and MySQL.
- Coordinated frontend-backend integration, delegated tasks based on team strengths, and managed weekly sprint reviews.
- Ensured timely project completion with focus on code quality, version control, and client-driven design approach.
